

# Tri-Mix plus

**High activity yeast that nurtures the development of ruminal bacteria**

Tri-mix Plus is a high activity yeast (*Saccharomyces Cerevisiae*) that nurtures the development of ruminal bacteria and allows the optimal PH maintenance in the rumen. It's applied to dairy cows, fattening calf, sow and pigs in the different breeding phases. It's particularly effective in the case of lack of appetite caused by hot weather or as a restorative of micro biotic ruminal flora.

# Tri-mix plus

## Benefit

- *Trimix helps ruminal bacteria development*
- *It controls and preserves optimal PH levels ,preventing acid conditions*
- *It stimulates the production of volatile fat acid and of available energy for udders thanks to the enhancement of ruminal function*
- *It enhances the flow of digestible proteins and amino acids towards the intestines, thanks to the formation of great amounts of bacterial proteins.*

- Use and doses :**
- **Dairy cows: 60 gr/ per cow/day**
  - **Fattening calves: 40 gr/per cow/day**
  - **Pigs: 200/250 gr per 100 kilograms of animal feed**

## Tri-Mix Plus

- It enhances eating abilities*
- It enhances digestive ability*
- It improves productivity*
- It improves the resistance to hot temperatures*
